SECOND QUARTER 2023 RESULTS

Market fundamentals for our business have remained positive. The performance of our operation in the US propelled results for the quarter, with strong demand across our product line and in particular our "Better for You" brand; this was coupled with continuous healthy demand in the Mexican market. In addition to the positive news from these two subsidiaries, performance in our operation in Asia and Oceania has picked up, while the European and Central American divisions have felt the effects of price sensitivity arising from inflation, more materially than our other operations, although still maintaining profitability. This was a solid quarter for us, as GRUMA delivered consolidated EBITDA growth of 31% and profitability grew 29% in terms of EBITDA per ton.

Disclosure of nature of business [text block]

Ticker: GRUMA Quarter: 2 Year: 2023

GRUMA, S.A.B. de C.V., is one of the world's leading tortilla and corn flour producers. With leading brands in most of its markets, GRUMA has operations in the United States, Mexico, Central America, Europe, Asia and Oceania.

Disclosure of management's objectives and its strategies for meeting those objectives [text block]

Our strategy is to focus on our core business—corn flour and tortilla—as well as to expand our product portfolio towards the flatbreads category in general. We will continue taking advantage of the increasing popularity of Mexican food and, more importantly, tortillas, in the U.S., European, Asian and Oceanian markets. We will also continue taking advantage of the adoption of tortillas by the consumers of several regions of the world for the preparation of different recipes other than Mexican food. Our strategy includes the following key elements:

Expand in the Tortilla Market in the United States: We believe that the size and growth of the tortilla market in this country still offer us significant opportunities for expansion, mainly in the retail channel, looking to continuously innovate our products with emphasis on healthy alternatives based on the preferences of our customers.

Enter and Expand in the Tortilla, Flatbread Markets and Flavored Corn Chips in Europe, Asia and Oceania: We believe that markets in other continents such as Europe, Asia and Oceania offer us significant opportunities. We believe our current operations will enable us to better serve our customers in those regions, with fresher products and respond more quickly to their needs.

Gradually Enter the Flat Bread and Flavored Corn Chips Markets in the United States and Mexico.

Maintain MISSION® and GUERRERO® Tortilla Brands as the First and Second National Brands in the United States and Position our Mission Brand in Other Regions of the World: We intend to achieve this by increasing our efforts at building brand name recognition, and by expanding and having presence in more supermarket chains.

Encourage Transition from the Traditional Cooked-Corn Method to the Corn Flour Method as Well as New Uses for Corn Flour: GRUMA introduced the corn flour method for the production of tortilla and other corn-based products to the market. We believe that there is still much growth potential and that the transition from the Traditional Method to the corn flour method of making tortillas and other corn-based products, is the primary opportunity for increased corn flour sales, particularly in Mexico. We continue working in expanding the use of corn flour in the manufacture of different types of products.

Invest in our Core Business and Focus on Optimizing Operational Matters: We intend to focus our capital expenditure program on our core business to enable us to meet future demand, consolidate our leading position in the industry and continue generating returns to the shareholders above our cost of capital.

Ticker: GRUMA Quarter: 2 Year: 2023

Disclosure of entity's most significant resources, risks and relationships [text block]

Our financial condition and results of operations may be influenced by some of the following factors:

- level of demand for tortillas and corn flour;
- increase or decrease in the Hispanic population in the United States;
- increases in Mexican food consumption by the non-Hispanic population in the United States; and use of tortillas in non-Mexican cuisine in the United States, Europe, Asia and Oceania;
- costs and availability of corn and wheat flour;
- costs of energy and other related products;
- acquisitions, plant expansions and divestitures;
- effects of government initiatives and policies;
- effects from variations of interest rates and exchange rates;
- volatility in corn and wheat prices and energetics costs;
- competition from tortilla manufacturers, especially in the United States;
- competition in the corn flour business; and
- general economic conditions in the countries where we operate and worldwide.

Disclosure of results of operations and prospects [text block]

SECOND QUARTER 2023 RESULTS

Market fundamentals for our business have remained positive. The performance of our operation in the US propelled results for the quarter, with strong demand across our product line and in particular our "Better for You" brand; this was coupled with continuous healthy demand in the Mexican market. In addition to the positive news from these two subsidiaries, performance in our operation in Asia and Oceania has picked up, while the European and Central American divisions have felt the effects of price sensitivity arising from inflation, more materially than our other operations, although still maintaining profitability. This was a solid quarter for us, as GRUMA delivered consolidated EBITDA growth of 31% and profitability grew 29% in terms of EBITDA per ton.

CONSOLIDATED RESULTS OF OPERATIONS

2Q23 versus 2Q22

Sales volume increased 1% compared to 2Q22, to 1,090 thousand metric tons, driven mainly by all subsidiaries except for the Central American division.

Net sales increased 24% to US\$1.7 billion due to (1) the transfer of incremental costs and expenses to the top line of the income statement; and (2) higher sales volume. Sales from non-Mexican operations represented 72% of consolidated figures.

Cost of sales ("COGS") increased 23% to US\$1.1 billion due to (1) higher raw material costs in all divisions; (2) higher labor costs; and (3) sales volume growth. As a percentage of net sales, COGS improved to 65.0% from 65.2%.

Selling, general and administrative expenses ("SG&A") increased 19% to US\$382.9 million due to (1) a rise in commissions paid, in line with higher revenues and volume growth; (2) greater distribution costs; and (3) higher marketing costs. As a percentage of net sales, SG&A improved to 23.1% from 24.0%.

Other expense, net, was US\$12.2 million compared to US\$5.0 million last year. The change resulted mainly from losses on GRUMA's FX hedging positions pertaining the purchase of corn at GIMSA.

Ticker: GRUMA Quarter: 2 Year: 2023

Operating income increased by 33% to US\$184.6 million. Operating margin expanded 70 basis points to 11.1% from 10.4%.

EBITDA increased 31% to US\$244.0 million, and EBITDA margin increased 70 basis points to 14.7% from 14.0%. EBITDA from non-Mexican operations represented 82% of consolidated figures.

Net comprehensive financing cost rose by 47% to US\$40.2 million, mainly due to an increase in debt service reflecting greater net working capital needs and benchmark rate adjustments.

Income taxes were US\$48.0 million, an 12% increase compared to 2Q22, due to higher pretax earnings resulting from the dynamics mentioned above. The effective tax rate for the quarter was 33.3% compared to 38.6% in 2Q22.

Majority net income increased 41% to US\$96.6 million.

GRUMA's strong performance continued in 2Q23 on the back of solid results in the US and strong demand in Mexico. The Asia and Oceania division also contributed to our performance, providing a positive outlook for the second half of the year.

SUBSIDIARY RESULTS OF OPERATIONS

2Q23 versus 2Q22

Gruma USA

				Y	οY		
Selected Income Statement Items (USD millions)		2Q23	%	2Q22	%	VAR (\$)	VAR (%)
GRUMA USA	Sales Volume ¹	402		400		2	1
Corn flour, tortillas, and other	Net Sales	928.5	100.0	755.2	100.0	173	23
	Operating Income	133.9	14.4	92.2	12.2	42	45
	EBITDA	172.8	18.6	123.0	16.3	50	41

¹ All sales volume figures are expressed in thousand metric tons.

Sales volume increased 1% to 402 thousand metric tons, driven mainly by the tortilla business. **The tortilla business** grew 4% in volume in 2Q23 spearheaded by GRUMA's "Better for You" product line, in addition to good performance in the food service channel, following the positive trends from previous quarters.

In **corn flour**, volumes contracted by 2% with continued effects of price sensitivity on some of GRUMA's industrial clients following the implementation of pricing strategies in previous quarters, in addition to a higher comparative base as a result of extraordinary growth in 2Q22. This was mitigated by strong performance from the retail channel in this business, with ongoing preference for home cooking over restaurant dining.

Ticker: GRUMA Quarter: 2 Year: 2023

Net sales increased 23% to US\$928.5 million reflecting (1) the passing of incremental costs and expenses to the top line of the income statement; and (2) a more profitable sales mix.

Cost of sales grew 21% to US\$551.5 million due mainly to (1) higher raw material costs; (2) higher labor costs; and (3) greater volume. Cost of sales as a percentage of net sales improved 120 basis points to 59.4% from 60.6% in 2Q22, as a result of the revenue and cost dynamics mentioned above.

SG&A increased 16% to US\$238.0 million due to higher sales expenses in connection to greater commissions in line with higher revenues during the quarter. As a percentage of net sales, SG&A improved to 25.6% from 27.2% in 2Q22.

Operating income increased 45% to US\$133.9 million, and operating margin grew 220 basis points to 14.4% from 12.2%.

EBITDA increased 41% to US\$172.8 million, and EBITDA margin increased to 18.6% from 16.3% in 2Q22.

Demand for our product line in the US remained robust in the tortilla space with solid results and no trade downs across our products. Corn flour still needs to undergo a recovery to return to its normalized operational levels, but price sensitivity has always been a part of our business and we expect this business line to improve during the second half of the year.

GIMSA

				Υ	οY		
Selected Income Statement Items (USD millions)		2Q23	%	2Q22	%	VAR (\$)	VAR (%)
GIMSA ¹	Sales Volume ²	523		510		13	3
Corn flour and other	Net Sales	489.6	100.0	410.7	100.0	79	19
	Operating Income	28.2	5.8	35.1	8.6	(7)	(20)
	EBITDA	39.9	8.1	53.1	12.9	(13)	(25)

¹ Convenience translation at the exchange rate of Ps. 17.072/dollar as of June 30, 2023. For further details see "Accounting Procedures".

Sales volume increased 3% to 523 thousand metric tons as a result of positive demand across our entire product line, and particularly from corporate accounts during 2Q23. Also, a lower comparison base in 2Q22 supported growth in the quarter.

Net sales increased 19% to US\$489.6 million due to (1) inflation management on GIMSA's cost structure; and (2) greater volume sold.

Cost of sales rose 24% to US\$378.9 million mainly due to the higher cost of corn. As a percentage of net sales, it increased to 77.4% from 74.5%.

² All sales volume figures are expressed in thousand metric tons.

Ticker: GRUMA Quarter: 2 Year: 2023

SG&A increased 17% to US\$74.4 million resulting mainly from (1) elevated distribution costs; and (2) higher sales commissions paid in line with volume and net sales growth. As a percentage of net sales, SG&A improved to 15.2% from 15.5%.

Other expense, net, was US\$8.2 million compared to US\$5.7 million in 2Q22, resulting mostly from volatility in the valuation of FX hedging positions pertaining corn purchases.

Operating income decreased 20% to US\$28.2 million, and operating margin was 280 basis points lower at 5.8%.

EBITDA decreased to US\$39.9 million from US\$53.1 million and EBITDA margin contracted 480 basis points to 8.1% from 12.9%.

Demand in Mexico continues to represent a stable source of volume expansion for GRUMA, setting a strong foundation for the second half of the year.

Gruma Europe

		YoY					
Selected Income Statement Items (USD millions)		2Q23	%	2Q22	%	VAR (\$)	VAR (%)
GRUMA EUROPE	Sales Volume ¹	113		109		4	3
Corn flour, tortillas, and other	Net Sales	110.9	100.0	113.4	100.0	(2)	(2)
	Operating Income	7.0	6.3	5.5	4.8	2	28
	EBITDA	10.4	9.4	9.0	7.9	1	16

¹ All sales volume figures are expressed in thousand metric tons.

Sales volume increased by 3% to 113 thousand metric tons, mainly supported by growth in the milling operation relative to 2Q22, where volumes were hindered by the logistic challenges brought on by the war in Ukraine. The tortilla business experienced some price sensitivity as inflation pressures have affected the purchasing power of the average consumer in Europe.

Net sales decreased by 2% to US\$110.9 million resulting from the greater proportion of corn milling products sold relative to 2Q22 and also relative to tortilla products sold during the quarter, resulting in a less profitable mix.

Cost of sales decreased 6% to US\$82.2 million resulting mainly from lower raw material costs when compared to 2Q22, in line with the type of products sold during the period. As a percentage of net sales, cost of sales improved to 74.1% from 77.3% due to the reduction in costs just mentioned.

SG&A increased 8% to US\$22.0 million mainly due to higher commissions paid in 2Q23. As a percentage of net sales, SG&A increased to 19.8% from 17.9%.

Ticker: GRUMA Quarter: 2 Year: 2023

Other income, net, totaled US\$0.2 million compared to US\$0.0 million in 2Q22 as a result of federal subsidies on energy prices.

Operating income was US\$7.0 million compared to US\$5.5 million in 2Q22. Operating margin expanded to 6.3% in 2Q23 from 4.8%.

EBITDA was US\$10.4 million, an improvement of 16% from US\$9.0 million in 2Q22, and EBITDA margin grew to 9.4% from 7.9% a year ago.

Although price sensitivity on the continent has been evident particularly in the tortilla business in 2Q23, the actions taken to protect profitability have been effective and have put this subsidiary back on track to recover its performance, even surpassing its historic levels of operation.

Gruma Asia and Oceania

				Y	οY		
Selected Income Statement Items (USD millions)		2Q23	%	2022	%	VAR (\$)	VAR (%)
GRUMA ASIA & OCEANIA	Sales Volume ¹	23		21		2	8
Corn flour, tortillas, and other	Net Sales	60.7	100.0	55.1	100.0	6	10
	Operating Income	3.9	6.4	2.5	4.6	1	54
	EBITDA	6.5	10.7	5.0	9.0	2	31

¹ All sales volume figures are expressed in thousand metric tons.

Sales volume increased 8% to 23 thousand metric tons as volumes in China, Malaysia and Australia had a positive expansion on the back of higher demand compared to 2Q22.

Net sales increased by 10% to US\$60.7 million as a result of the implementation of pricing strategies to manage inflation and protect profitability.

Cost of Sales increased 7% to US\$43.3 million during the quarter due to (1) higher raw material costs; and (2) higher labor and packaging costs in the quarter. As a percentage of net sales, it decreased to 71.3% from 73.4% in 2Q22.

SG&A increased 11% to US\$13.5 million, as a result of (1) higher logistics and distribution costs; and (2) increased marketing costs. As a percentage of net sales, SG&A increased to 22.3% from 22.0% in 2Q22.

Operating Income rose by 54% to US\$3.9 million, while operating margin was 6.4% compared to 4.6% in 2Q22.

EBITDA grew by 31% to US\$6.5 million, and EBITDA margin increased 170 basis points to 10.7% from 9.0% in 2Q22.

As our operation in Asia and Oceania continues to recover, we are focused on protecting profitability to then leverage our results with higher volume growth in this division.

Ticker: GRUMA Quarter: 2 Year: 2023

Gruma Centroamérica

				Y	οY		
Selected Income Statement Items (USD millions)		2Q23	%	2022	%	VAR (\$)	VAR (%)
GRUMA CENTROAMÉRICA	Sales Volume ¹	56		61		(5)	(8)
Corn flour and other	Net Sales	88.1	100.0	77.1	100.0	11	14
	Operating Income	9.6	10.9	8.1	10.5	1	18
	EBITDA	11.4	12.9	9.8	12.6	2	17

¹ All sales volume figures are expressed in thousand metric tons.

Sales volume decreased 8% to 56 thousand metric tons as a result of (1) lower demand for rice products; and (2) price sensitivity in corn flour products derived from recently implemented strategies to protect profitability in this subsidiary. In addition, a higher comparative base in 2Q22 as a result of extraordinary growth affected sales volume growth in 2Q23.

Net sales increased 14% to US\$88.1 million in line with (1) the passing of additional costs and expenses to revenues; and (2) a more profitable product mix.

Cost of sales increased 14% to US\$58.5 million due to (1) higher cost of raw materials; and (2) elevated power and fuel costs. As a percentage of net sales, cost of sales increased to 66.4% from 66.3% due to the abovementioned revenue and cost dynamics.

SG&A increased 15% to US\$20.5 million due to (1) higher freight and overall logistics and distribution costs; and (2) higher marketing costs relative to 2Q22. As a percentage of net sales, SG&A increased to 23.2% from 23.1%.

Operating income increased 18% to US\$9.6 million and operating margin increased 400 basis points to 10.9% from 10.5% as a result of the revenue growth mentioned above.

EBITDA increased 17% to US\$11.4 million from US\$9.8 million in 2Q22, and EBITDA margin expanded 30 basis points to 12.9% from 12.6%.

Results in this subsidiary reflect a much higher comparison base and price sensitivity due to recent measures to protect profitability. However, both of these issues are temporary in nature and a natural result of protecting profitability.

Other Subsidiaries and Eliminations

Operating income increased to US\$2.0 million from a US\$4.8 million loss in 2Q22 as a result of higher corporate results.

CONFERENCE CALL

Ticker: GRUMA Quarter: 2 Year: 2023

The second quarter conference call will be held on Thursday, July 20, 2023, at 12:30 pm Eastern Time (10:30 am Monterrey Time). To access the call, please dial: domestic US +1 (877) 407-0784, international +1 (201) 689-8560.

ACCOUNTING PROCEDURES

The consolidated figures have been prepared in accordance with the International Financial Reporting Standards (IFRS). The consolidated financial statements are presented in U.S. dollars, currency that corresponds to the presentation currency of the Company. The results of the entities that have a functional currency which differs from the Company's presentation currency are translated into U.S. dollars applying the average exchange rate for the period. Nevertheless, under the section "Subsidiary Results of Operations" and the table "Financial Highlights by Subsidiary" of this report, figures for GIMSA were translated into U.S. dollars using a convenience translation at the exchange rate of Ps.17.072/dollar as of June 30, 2023. The differences between the use of convenience translation and the average exchange rate for the period are recorded under the line "Convenience Translation Effect" of the same table.

ABOUT GRUMA

Since 1949, GRUMA, S.A.B. de C.V., is one of the world's leading tortilla and corn flour producers. With leading brands in most of its markets, GRUMA has operations in the United States, Mexico, Central America, Europe, Asia and Oceania. GRUMA is headquartered in San Pedro Garza García, Mexico, and has approximately 25,800 employees and 74 plants. In 2022, GRUMA had net sales of US\$5.6 billion, of which 75% came from non-Mexican operations. For further information, please visit www.gruma.com.

This report may contain certain forward-looking statements and information relating to GRUMA, S.A.B. de C.V., and its subsidiaries (collectively, "GRUMA") that are based on the beliefs of its management as well as assumptions made by and information then available to GRUMA. Such statements reflect the views of GRUMA with respect to future events and are subject to certain risks, uncertainties, and assumptions. Many factors could cause the actual results, performance, or achievements of GRUMA to be materially different from historical results or any future results, performance, or achievements that may be expressed or implied by such forward-looking statements. Such factors include, among others, changes in economic, political, social, governmental, business, or other factors globally or in Mexico, the United States,

Latin America, or any other countries in which GRUMA does business, and world corn and wheat costs. If one or more of these risks or uncertainties materializes, or underlying assumptions are proven incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated, expected, or targeted. GRUMA does not intend, and undertakes no obligation, to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

This report was translated from Spanish into English and presented only for purpose of complying with the requirements of GRUMA's US\$400 million 4.875% senior notes due 2024. Financial position, liquidity and capital resources [text block]

FINANCIAL POSITION

June 2023 versus March 2023

Balance Sheet Highlights

Total assets remained flat at US\$4.8 billion when compared to March 2023, reflecting the combination of a 10% decrease in cash and equivalents and 2% growth in Property, Plant and Equipment.

Total liabilities remained unchanged at US\$3.2 billion, with a decrease in accounts payable and an increase in short term debt.

Majority shareholders' equity increased 1% to US\$1.6 billion.

Debt Profile

GRUMA's debt increased 5% to US\$2.1 billion in connection with the financing of working capital. Approximately 64% of GRUMA's debt was USD denominated.

Internal control [text block]

We carried out an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer, Chief Financial Officer and Chief Administrative Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based upon our evaluation, our Chief Executive Officer, Chief Financial Officer and Chief Administrative Officer concluded that our disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit is recorded, processed, summarized and reported within the time periods specified in the applicable rules and forms, and that it is accumulated and communicated to our management, including our Chief Executive Officer, Chief Financial Officer and Chief Administrative Officer, as appropriate to allow timely decisions regarding required disclosure.

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Under the supervision and with the participation of our management, including our Board of Directors, Chief Executive Officer, Chief Financial Officer, Chief Administrative Officer and other personnel, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control—Integrated Framework (v.2013) by the Committee of Sponsoring Organizations of the Treadway Commission.

Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS as issued by IASB. Our internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with IFRS, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of our assets that could have a material effect on our financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Based on our evaluation under the framework in Internal Control—Integrated Framework (v.2013), our management concluded that our internal control over financial reporting was effective.

There has been no change in our internal control over financial reporting that has materially affected, or is reasonably likely that could materially affect, our internal control over financial reporting.

[800007] Annex - Financial derivate instruments

Management discussion about the policy uses of financial derivate instruments, explaining if these policies are allowed just for coverage or for other uses like trading [text block]

1. Derivative financial instruments contracting policies.

Gruma's policies regarding financial instruments establish that the acquisition of any derivative financial instruments agreement must be associated with the hedging of an underlying operation of the company, such as the purchase of inventory or fuel consumption (commodities), interest payment at a determined rate, foreign currency payments at an exchange rate, among others.

Gruma has a Risks Management policy that details the procedure to authorize their contracting.

2. General description of the objectives for using derivative financial instruments.

The availability and price of corn and other agricultural commodities are subject to important fluctuations due to factors that are beyond our control, such as the weather, planting seasons, agricultural programs and government policies (both national and foreign), changes in the global supply/demand created by population growth, competitors and global production of similar harvests. The objective of using derivative financial instruments is to reduce the aforementioned risks.

Also, in the normal course of business, Gruma enters into transactions in which it could be exposed to risks due to changes in the interest rates or fluctuations of the exchange rates. The variations in the exchange rates can result from changes in the economic conditions, tax and monetary policies, volatile conditions, global markets liquidity, international and local political events, among others. In order to minimize these risks Gruma has entered into certain financial instruments.

3. Instruments used and hedging or negotiation strategies implemented.

We hedge a part of our production requirements through futures, swaps and options contracts in order to minimize the risk generated by the fluctuations in the price and supply of corn, wheat, natural gas and diesel, risks that exist as an ordinary part of our business.

Additionally, Gruma has entered into various financial instruments such as interest rate swaps and foreign exchange forwards (FX).

4. Allowed negotiation markets and eligible counterparties.

Ticker: GRUMA Quarter: 2 Year: 2023

In order to minimize the counterparty solvency risk, Gruma enters into derivative financial instruments only with major national and international financial institutions, using mainly when applicable depending on the derivative instrument used, the standard International Swaps and Derivatives Association, Inc. ("ISDA") authorized forms and long form confirmation agreements.

5. Policies on the appointment of calculation or valuation agents.

Gruma appoints the counterparties as calculation agents who periodically send the account statements of the open positions of the financial instruments.

6. Policies on margins, collaterals, credit lines, VAR.

The Central Risks Committee of Gruma establishes that the derivative financial transactions may be performed with collaterals or using credit lines for that purpose.

The majority of the executed transactions establish certain obligations on behalf of the Issuer to guarantee, from time to time, the differential between fair value and the credit line (risk margin) established with the respective financial institutions, consequently the timely compliance of those obligations are assured. Additionally, it is made clear that, upon failure to fulfill the obligations of providing collateral, the counterparty will have the right, but not the obligation, to early terminate the transactions in place, and to demand the corresponding consideration pursuant to the agreed terms. In addition, and in order to maintain a risk exposure level within the boundaries authorized by the Central Risks Committee and the Audit Committee, the Corporate Treasury department reports, in a weekly and monthly manner, the information about the Derivative Financial Instruments to the Central Risks Committee, and quarterly to the Audit Committee and the Board of Directors.

As of June 30 2023, Gruma has margin calls with their counterparty for \$8,407 thousand dollars.

7. Internal control procedures to manage the exposure to market and liquidity risks.

The Corporate Treasury and the Finance Department of each region in which the company has operations, evaluate the changes in the exposure of the derivative financial instruments and periodically informs them to the Chief Financial Officer, and the latter informs Chief Executive Officer and the Central Risks Committee when the market conditions have materially changed. The execution of the derivative financial instruments is authorized pursuant to the guidelines set forth in the Risks Management policy of the company.

8. Existence of an independent third party who reviews the aforementioned procedures.

The procedures are reviewed in the external audit process performed by PricewaterhouseCoopers, S. C. annually.

9. Information regarding the authorization of the use of derivatives and if there is a committee in charge of giving those authorizations and the derivatives risk management.

Ticker: GRUMA Quarter: 2 Year: 2023

All derivative financial transactions must be previously authorized by a Divisional Risks Committee and by the Central Risks Committee which is formed by members of the senior management and is designated by the Audit Committee and the Board of Directors.

General description about valuation techniques, standing out the instruments valuated at cost or fair value, just like methods and valuation techniques [text block]

10. Description of methods, valuation techniques and valuation frequency:

Derivative financial instruments that are not reported as hedging instruments for accounting purposes are initially recorded at fair value. The result of this valuation is recognized in the income statement. All accounting records comply with applicable regulations and are based on the official financial statements of each Financial Institution.

For derivative financial instruments that qualify as cash flow hedges, the effects of changes in the fair value of such derivative financial instrument are included within the other comprehensive income in equity, based on an evaluation of the hedge effectiveness. Such changes in the fair value are reclassified to income in the period when the firm commitment or projected transaction is carried out. Derivative financial instruments that qualify as fair value hedges are initially recorded at fair value and the effects of changes in the fair value are recorded in the income statement, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk.

11. Clarification concerning if the valuation is performed by an independent third party or if it is an internal valuation and on which cases one or the other valuation is used. If it is performed by a third party, if his arranger, seller or counterparty of the derivative financial instrument is mentioned.

Gruma determines the fair value based on recognized market prices. When not quoted in markets, fair value is determined using valuation techniques commonly used in the financial sector. Fair value reflects the credit risk of the instrument and includes adjustments to consider the credit risk of the Company or the counterparty, when applicable. Regarding purchases of corn, wheat, natural gas and diesel futures the market values of the US Chicago and New York futures exchanges are taken as reference, through the specialized Financial Institutions engaged for such purposes. These valuations are made periodically.

12. For hedging instruments, explanation of the method used to determine its effectiveness, identifying the current available hedging level of the global position.

Hedge effectiveness is determined at the inception of the hedge relationship, and through periodic effectiveness assessments to ensure that an economic relationship exists between the hedged item and hedging instrument.

When a hedge is no longer effective as well as when the hedge does not comply with the documentation requirements set forth in the International Financial Reporting Standards the

Ticker: GRUMA Quarter: 2 Year: 2023

results of the valuation of the financial instruments at their fair value are recognized in the income statement.

As of June 30, 2023, the open positions of financial instruments of corn that qualified as hedges had 100% of effectiveness.

Management discussion about intern and extern sources of liquidity that could be used for attending requirements related to financial derivate instruments [text block]

13. Discussion on the internal and external sources of liquidity that could be used to attend the requirements related to derivative financial instruments.

There is potential liquidity requirements under our derivative financial instruments described in Section II below. Gruma plans to use its available cash flow as well as other available liquidity sources to satisfy such liquidity requirements.

Changes and management explanation in principal risk exposures identified, as contingencies and events known by the administration that could affect future reports [text block]

14. Description of the changes in the exposure to major identified risks, its management and contingencies that could affect it in future reports.

The availability and price of corn and other agricultural commodities are subject to important fluctuations due to factors that are beyond our control, such as the weather, planting seasons, agricultural programs and government policies (both national and foreign), changes in the global supply/demand created by population growth, competitors and global production of similar harvests. We hedge a part of our production requirements through futures contracts, options and swaps in order to reduce the risk generated by the fluctuations in price and supply of corn, wheat, natural gas and diesel, risks that exist in the normal course of our business.

Gruma carried out forward and options transactions with the intention of hedging the currency risk of the Mexican peso with respect to the U.S. dollar, related with the price of corn purchases for domestic and imported harvest. Sometimes the Company also uses forwards to hedge net sales in dollars of exports of some local divisions in order to secure margins. The variations in the exchange rate can result from changes in the economic conditions, tax and monetary policies, volatile conditions, global markets liquidity, international and local political events, among others.

15. Disclosure of eventualities, such as changes on the value of the underlying asset, which cause it to differ from the one originally agreed, that modify it, or that the hedging level has changed, pursuant to which the issuer is required to assume new obligations or affect its liquidity.

Gruma carried out forward and options transactions with the intention of hedging the currency risk of the Mexican peso with respect to the U.S. dollar, related with the price of corn purchases for domestic and imported harvest.

Ticker: GRUMA Quarter: 2 Year: 2023

The fair value of these derivative instruments can decrease or increase in the future before the instruments expire. The variations in the exchange rate can result from changes in the economic conditions, tax and monetary policies, volatile conditions, global markets liquidity, international and local political events, among others.

16. Include Influence on results or cash flow of the mentioned derivative transactions:

- (a) Cash flow hedging: For cash flow hedge transactions, changes in the fair value of the derivative financial instrument are included as other comprehensive income in equity, based on the evaluation of the hedge effectiveness
- (b) Fair value hedge: Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the income statement, together with changes in the fair value of the hedged asset or liability that are attributable to the hedged risk
- (c) Trading: The Company uses derivative financial instruments only for hedging purposes and not as speculative trading. However, when the derivatives do not meet the hedge accounting criteria, they are classified as "trading instruments" for accounting purposes and are recorded at fair value through profit or loss.
- (d) Financial assets and financial liabilities are offset and the net amount is presented in the consolidated statement of financial position when the right to offset the recognized amounts is legally enforceable and there is an intention to settle them on a net basis or to realise the asset and settle the liability simultaneously. The amount of \$2,671 thousand dollars represents only those margin calls required to the Company that are offset for purposes of the financial statements.
- 17. Description and number of the derivative financial instruments that had expired during the quarter and those which its position has been closed:

Ticker: GRUMA Quarter: 2 Year: 2023

- 1)Forward hedge with a cap of \$23.00 pesos per dollar.
- 2)Forward hedge with a cap of \$22.20 pesos per dollar.
- 3)The sole purpose of the Company's acquisition of derivative financial instruments is hedging market and liquidity risks, notwithstanding, the accounting rules require specific documentation and evidence to classify a derivative financial instrument as a hedging instrument, and consequently the company classified its derivative financial instruments as negotiation instruments.

B. Sensitivity analysis

Exchange Rate Derivative Financial Instruments:

Based on the position as of June 30, 2023, a hypothetical 10% downward change in market prices applied to the fair value of the instruments would result in an additional charge to results of \$6,542 thousand dollars (for non-qualifying contracts). This sensitivity analysis is based in the value of the underlying assets given in the valuation made by the counterparty as of June 30, 2023, which includes the effects on the exchange rate variables, time and volatility. The result of the sensitivity analysis is as follows:

Ticker: GRUMA Quarter: 2 Year: 2023

		Hedging /		١	iotional	AsofJun	30, 2023 Potential Loss (Thou sands of USD)		Potential Loss (Thou sands	
Type of Derivative	Purchase / Sell	Negotiation purpose	Currency exchange	Amount (Thousands of USD)		Underlying Asset	Fair Value (Thousands of USD)	Variation 10%	Variation 25%	Variation 50%
Forwards	Purchase	Negotiation*	USD-MXN	\$	56,000	19.9450	(8,740)	(6,542)	(16,356)	(32,712)
				\$	56,000		(8,740)	(6,542)	(16,356)	(32,712)

^{*} The sole purpose of the Company's acquisition of derivative financial instruments is hedging market and liquidity risks, notwithstanding, the accounting rules require specific documentation and evidence to classify a derivative financial instrument as a hedging instrument, and consequently the company classified its derivative financial instruments as negotiation instruments.

26. For derivative financial instruments with negotiation purposes or those whose Ineffectiveness of the hedge must be acknowledged, description of the method applied in determining the expected losses or the price sensitivity of the derivatives, including volatility.

The potential losses of the derivative financial instruments were determined pursuant to the underlying assets' value and their volatility, under a sensibility analysis considering a 10%, 25% and 50% loss in the underlying assets' value.

- 27. Presentation of a sensitivity analysis for such transactions that includes, at least, the following elements:
 - a)Identification of the risks that may create losses in the issuer for derivative transactions.
 - b) Identification of the instruments that would create such losses.

The fair value of corn and fuels derivative financial instruments can decrease or increase in the future before the date of maturity of the instruments. These variations can be the result of factors that are beyond our control, such as the weather, planting seasons, agricultural programs and government policies (both national and foreign), changes in the global supply/demand created by population growth, competitors and global production of similar harvests.

The fair value of the foreign exchange financial instruments can decrease or increase in the future before the expiration date. These variations in the exchange rate can be the result of changes in the economic, fiscal policies or monetary conditions, volatility, liquidity in global markets, international or local political events, among others.

- 28. Presentation of 3 scenarios (probable, possible and remote or stress) that can create negative circumstances for the issuer, identifying the assumptions and factors taken into consideration in their execution.
 - a) Possible scenario with a variation of at least 25% in the underlying asset's price and remote scenario with a variation of at least 50%.

The sensitivity chart already contains this information.

Ticker: GRUMA Quarter: 2 Year: 2023

29. Estimation of the potential loss reflected in the income statement and cash flow for each scenario.

For the foreign exchange financial instruments, based on our position as of June 30, 2023, a hypothetical change of 10%, 25% and 50% of appreciation of the Mexican peso against the United States dollar would result in an additional charge of \$6,542, \$16,356 and \$32,712 thousand dollars, respectively.

30. For hedging financial instruments, indication of the level of stress or the variation of the underlying assets under which the effectiveness measures result sufficient.

Hedge effectiveness is determined at the inception of the hedge relationship, and through periodic effectiveness assessments to ensure that an economic relationship exists between the hedged item and hedging instrument.

When a hedge is no longer effective as well as when the hedge does not comply with the documentation requirements set forth in the International Financial Reporting Standards the results of the valuation of the financial instruments at their fair value are recognized in the income statement.

Description of accounting policy for biological assets [text block]

The Company does not have this type of assets.

Description of accounting policy for business combinations [text block]

-BUSINESS COMBINATIONS

Business combinations are recognized through the acquisition method of accounting. The consideration transferred for the acquisition of a subsidiary is measured as the fair value of the assets transferred, the liabilities incurred by the Company with the previous owners and the equity instruments issued by the Company. The cost of an acquisition also includes the fair value of any contingent payment.

The related acquisition costs are recognized in the income statement when incurred.

Identifiable assets acquired, liabilities assumed and contingent liabilities in a business combination are measured at fair value at the acquisition date.

Ticker: GRUMA Quarter: 2 Year: 2023

The Company recognizes any non-controlling interest as the proportional share of the net identifiable assets of the acquired entity.

The Company recognizes goodwill when the cost including any amount of non-controlling interest in the acquired entity exceeds the fair value at acquisition date of the identifiable assets acquired and liabilities assumed.

When the entity or entities acquired are, before and after the acquisition, ultimately controlled by the same entity, and such control is not temporary, it is assumed that the entities are under common control and therefore, there is no business combination. Transactions and exchanges between entities under common control are recognized on the basis of the carrying value of assets and liabilities transferred on the date of the transaction, and therefore, goodwill is not recognized.

Description of accounting policy for derivative financial instruments and hedging [text block]

-DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGING ACTIVITIES

Derivative financial instruments are initially recognized at fair value and are subsequently re-measured at their fair value; the transaction costs are recognized in the income statement when incurred. Derivative financial instruments are classified as current, except for maturities exceeding twelve months.

Fair value is determined based on recognized market prices. When not quoted in markets, fair value is determined using valuation techniques commonly used in the financial sector. Fair value reflects the credit risk of the instrument and includes adjustments to consider the credit risk of the Company or the counterparty, when applicable.

The method for recognizing the resulting gain or loss depends on whether the derivative is designated as a hedge and the nature of the item being hedged.

For derivative financial instruments that are entered into to hedge certain risks and do not qualify for hedge accounting, the changes in the fair value of such instruments are recognized immediately in the income statement as Other (expenses) income, net or Comprehensive financing cost, net, according to the nature of the hedged item.

The derivative financial instruments that the Company designates and qualifies as accounting hedges, are classified as follows:

- -Hedges of the fair value of recognized assets or liabilities or a firm commitment (fair value hedge);
- -Hedges of a particular risk associated with a recognized asset or liability or a highly probable forecast transaction (cash flow hedge); or
- -Hedges of a net investment in a foreign operation (net investment hedge).

The Company documents at the inception of the transaction the relationship between hedging instruments and hedged items, including objectives, strategies for risk management and the method for assessing effectiveness in the hedge relationship. Hedge effectiveness is determined at the inception of the hedge relationship, and through periodic

Ticker: GRUMA Quarter: 2 Year: 2023

effectiveness assessments to ensure that an economic relationship exists between the hedged item and hedging instrument.

a. Fair value hedges

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the income statement, together with changes in the fair value of the hedged asset or liability that are attributable to the hedged risk.

b. Cash flow hedges

For cash flow hedge transactions, changes in the fair value of the derivative financial instrument are included as other comprehensive income in equity, based on the evaluation of the hedge effectiveness.

When option contracts are used to hedge forecast transactions, the Company designates only the intrinsic value of the options as the hedging instrument. Gains or losses related to the effective portion of the change in the intrinsic value of the options are recognized in other comprehensive income within equity. Changes in the time value of options that are related to the hedged item (aligned time value) are recognized in other comprehensive income within equity. The intrinsic value of options on foreign currency transactions is determined by reference to the spot exchange rate of the relevant market. The spread between the contracted strike price and the discounted market spot rate is defined as time value. When material, the value is discounted.

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognized in the cash flow hedge reserve within equity. The gain or loss relating to the ineffective portion is recognized immediately in income as other (expenses) income, net.

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in equity and is recognized when the forecasted transaction is ultimately registered in the income statement. However, when the forecasted transaction recognizes a non-financial asset or non-financial liability, the cumulative gains or losses recognized in other comprehensive income are transferred from equity and included in the initial measurement of the non-financial asset or non-financial liability.

c. Net investment hedge

Hedges of net investments in foreign operations are accounted for similarly to cash flow hedges. Any gain or loss on the hedging instrument relating to the effective portion of the hedge is recognized in other comprehensive income. The gain or loss relating to the ineffective portion is recognized in the income statement. Gains and losses accumulated in equity are included in the income statement when the foreign operation is partially disposed of or sold.

Description of accounting policy for determining components of cash and cash equivalents [text block]

Ticker: GRUMA Quarter: 2 Year: 2023

-CASH AND CASH EQUIVALENTS

Cash and cash equivalents include cash and short term highly liquid investments with original maturities of less than three months. These items are recognized at historical cost, which do not differ significantly from its fair value.

Description of accounting policy for earnings per share [text block]

-EARNINGS PER SHARE

Basic earnings per share is calculated by dividing the profit attributable to equity holders of the Company by the weighted average number of ordinary shares outstanding during the year, excluding ordinary shares purchased by the Company and held as treasury shares. Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares, which include convertible debt and share options.

Description of accounting policy for employee benefits [text block]

-EMPLOYEE BENEFITS

a. Post-employment benefits

In Mexico, the Company has the following defined benefit plans:

- -Single-payment retirement plan, when employees reach the required retirement age, which is 60.
- -Seniority premium, after 15 years of service.

The Company has established trust funds to meet its obligations for the seniority premium. Employees do not contribute to these funds.

The liability recognized in the balance sheet in respect of defined benefit plans is the present value of the defined benefit obligation, less the fair value of plan assets. The Company determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the net defined benefit liability (asset). The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method.

The present value of the defined benefit obligation is determined by discounting the estimated cash outflows using discount rates in accordance with IAS 19, that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related liability.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise. Past service costs are recognized immediately in the income statement.

Ticker: GRUMA Quarter: 2 Year: 2023

In the United States, the Company has saving and investment plans that incorporate voluntary employees 401(k) contributions with matching contributions of the Company in this country. The Company's contributions are recognized in the income statement when incurred.

b. Termination benefits

Termination benefits are payable when employment is terminated by decision of the Company before the normal retirement date.

The Company recognizes termination benefits as a liability at the earlier of the following dates: (a) when the Company can no longer withdraw the offer of those benefits; and (b) when the Company recognizes restructuring costs that represents a provision and involves the payment of termination benefits. Termination benefits that do not meet this requirement are recognized in the income statement in the period when incurred.

c. Short term benefits

Short term employee benefits are measured at nominal base and are recognized as expenses as the related service is provided. If the Company has the legal or constructive obligation to pay as a result of a service rendered by the employee in the past and the amount can be estimated, an obligation is recognized for short term bonuses or profit sharing.

Description of accounting policy for financial assets [text block]

Financial assets

(i) Classification

The Company classifies its financial assets in the following categories:

- Those to be measured at amortized cost.
- Those to be measured subsequently at fair value (either through other comprehensive income or through profit or loss).

The classification depends on the Company's business model for managing the financial assets and the contractual terms of the cash flows.

Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

The Company classifies a financial asset to be measured at amortized cost if the asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest.

Ticker: GRUMA Quarter: 2 Year: 2023

The Company classifies a financial asset to be measured at fair value through other comprehensive income if the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest.

(ii) Recognition

Regular purchases and sales of financial assets are recognized in the balance sheet on the trade date, which is the date when the Company commits to purchase or sell the instrument. Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or the Company has transferred substantially all the risks and rewards of ownership.

(iii) Measurement

At initial recognition, the Company measures a financial asset at fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are recognized as expense.

After initial recognition, the Company measures financial assets at amortized cost or at fair value with changes in other comprehensive income or in results of the year.

(iv) Impairment

The Company applies the simplified approach, which requires expected lifetime losses to be recognized from initial recognition of the trade receivables and long-term notes and accounts receivable.

To measure the expected credit losses, the assets have been grouped based on shared credit risk characteristics and the days past since their initial recognition. The expected loss rates are based on the payment profiles of sales over a period of 12 months before December 31, 2022, and the corresponding historical credit losses experienced within this period.

Accounts receivable and long-term receivables are canceled when there is no reasonable expectation of collection.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is presented in the consolidated statement of financial position when the right to offset the recognized amounts is legally enforceable and there is an intention to settle them on a net basis or to realise the asset and settle the liability simultaneously.

Description of accounting policy for financial instruments [text block]

Ticker: GRUMA Quarter: 2 Year: 2023

Regular purchases and sales of financial assets are recognized in the balance sheet on the trade date, which is the date when the Company commits to purchase or sell the instrument. Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or the Company has transferred substantially all the risks and rewards of ownership.

Description of accounting policy for financial instruments at fair value through profit or loss [text block]

See description of the accounting policy for financial assets and financial liabilities.

Description of accounting policy for financial liabilities [text block]

Financial liabilities

(i) Classification

The Company classifies its financial liabilities to be measured at amortized cost, except for the liabilities from derivative financial instruments that are measured at fair value through profit or loss.

Debt and financial liabilities

Debt and financial liabilities that are non-derivatives are initially recognized at fair value, net of transaction costs directly attributable to them; subsequently, these liabilities are recognized at amortized cost. The difference between the net proceeds and the amount payable is recognized in the income statement during the debt term, using the effective interest rate method.

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities for trading (derivative financial instruments).

(ii) Derecognition

Financial liabilities are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in income.

Offsetting of financial instruments

Ticker: GRUMA Quarter: 2 Year: 2023

Financial assets and financial liabilities are offset and the net amount is presented in the consolidated statement of financial position when the right to offset the recognized amounts is legally enforceable and there is an intention to settle them on a net basis or to realise the asset and settle the liability simultaneously.

Description of accounting policy for foreign currency translation [text block]

-FOREIGN CURRENCY

a. Foreign currency transactions

Transactions that are realized in a different functional currency of each consolidated entity are translated using the exchange rates effective at the date of the transaction. Monetary assets and liabilities denominated in foreign currency are translated at year-end exchange rates. The differences that arise from the translation of foreign currency transactions are recognized in the income statement.

b. Currency translation of entities

Currency translation of entities for subsidiaries with non-hyperinflationary economies

The financial statements of the Company's entities are measured using the currency of the main economic environment where each entity operates (functional currency). The consolidated financial statements are presented in american dollars, currency that corresponds to the presentation currency of the Company.

The financial position and results of the entities that have a functional currency which differs from the Company's presentation currency are translated as follows:

- -Assets and liabilities are translated at the closing rate of the year.
- -Income and expenses are translated at average exchange rates when it has not fluctuated significantly during the period.
- -Equity is translated at the effective exchange rate in the date when the contributions were made and the earnings were generated.
- -All resulting exchange differences are recognized in other comprehensive income as a separate component of equity denominated "Cumulative translation adjustments".

Currency translation of entities for subsidiaries with hyperinflationary economies

Previous to the translation to dollars, the financial statements of entities whose functional currency is from an hyperinflationary environment, are adjusted by the inflation factor in order to reflect the changes in purchasing power of the local currency. Subsequently, assets, liabilities, equity, income, costs, and expenses are translated to the presentation currency at the closing rate at the end of the period. To determine the existence of hyperinflation, the Company evaluates the qualitative characteristics of the economic environment, as well as the quantitative characteristics established by IFRS of an accumulated inflation rate equal or higher than 100% in the past three years.

Ticker: GRUMA Quarter: 2 Year: 2023

The Company presents the hyperinflation effects and reporting currency translation in equity in the item cumulative translation adjustments, because it is considered that the combination of both effects meets the definition of exchange difference in accordance with IAS 21.

The Company applies hedge accounting to foreign exchange differences originated between the functional currency of a foreign subsidiary and the functional currency of the Company. Exchange differences resulting from the translation of a financial liability designated as hedge for a net investment in a foreign subsidiary, are recognized in "other comprehensive income" as a separate component denominated "Cumulative translation adjustments" while the hedge is effective.

c. Recognition of the effects of inflation in countries with hyperinflationary economies

The company recognize the effects of inflation in the financial information of its subsidiaries when they operate in a hyperinflationary economy.

The main procedures to apply the effects of inflation to the financial information of the subsidiary are the following:

- -Non-monetary assets such as property, plant and equipment, intangible assets and inventories that are not registered in actual values at the date of the balance sheet, as well as equity components, are restated by applying the corresponding inflation factors since the acquisition or contribution date.
- -Items of the statement of comprehensive income are restated by applying the inflation factors, except for depreciation and amortization, and the cost impact of the inventories at the time of consumption.
- -Gain or loss of monetary assets held is presented in income statement and is determined by applying the inflation factor of the period to the difference between monetary assets and liabilities.

Turkey

Starting April 2022, Turkey is considered a hyperinflationary economy due mainly to the accumulated inflation in the last 3 years that surpass the 100%. The downturn of the economic condition and the foreign exchange controls, support the conclusion that, for accounting purposes, is a hyperinflationary economy. From that date, the financial information of the subsidiary located in Turkey have been adjusted to recognize the cumulative effects of inflation with retroactive effects from January 1, 2022. These effects do not represent a significant impact in the consolidated accounts of the Company.

Description of accounting policy for functional currency [text block]

-FUNCTIONAL AND PRESENTATION CURRENCY

The functional currency of GRUMA, S.A.B. de C.V., parent company, is in Mexican pesos. The presentation currency for the consolidated financial statements is the American dollar.

Ticker: GRUMA Quarter: 2 Year: 2023

Description of accounting policy for impairment of assets [text block]

-IMPAIRMENT OF LONG-LIVED ASSETS

The Company performs impairment tests for its property, plant and equipment, right-of-use assets and intangible assets with finite useful lives, when certain events and circumstances suggest that the carrying value of the assets might not be recovered. Intangible assets with indefinite useful lives and goodwill are subject to impairment tests at least once a year.

An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount of an asset or cash-generating unit is the higher of an asset's fair value less costs to sell and value in use. To determine value in use, estimated future cash flows are discounted at present value, using a discount rate after tax that reflect time value of money and considering the specific risks associated with the asset. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating unit) and in some cases they are grouped to evaluate them at the operating segment level.

Impairment losses on goodwill are not reversed. For other assets, impairment losses are reversed if a change in the estimates used for determining the recoverable amount has occurred. Impairment losses are reversed to the extent that the book value does not exceed the book value that was determined, net of depreciation or amortization, if no impairment loss was recognized.

Description of accounting policy for income tax [text block]

-INCOME TAXES

The tax expense of the period comprises current and deferred tax. Tax is recognized in the income statement, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is recognized from the analysis of the balance sheet considering temporary differences arising between the tax bases of assets and liabilities and their carrying amounts. Deferred income tax is determined using tax rates that have been approved or substantially approved at the date of the balance sheet and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

Deferred income tax assets are recognized for tax loss carry-forwards not used, tax credits and deductible temporary differences, only to the extent that it is probable that future taxable profit will be available against which the

Ticker: GRUMA Quarter: 2 Year: 2023

temporary differences can be utilized. In each period-end deferred income tax assets are reviewed and reduced to the extent that it is not probable that the benefits will be realized.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, except where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset if the entity has a legally enforceable right to set off assets against liabilities and are related to income tax levied by the same tax authority on the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

Description of accounting policy for intangible assets and goodwill [text block]

-INTANGIBLE ASSETS

a. Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the Company's share of the net identifiable assets of the acquired subsidiary at the date of acquisition. Goodwill is tested annually for impairment and is carried at cost less accumulated impairment losses. Gains and losses on the disposal of an entity include the carrying amount of goodwill related to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose, identified according to the operating segment.

b. Intangible assets with finite useful lives

Intangible assets with finite useful lives are carried at cost less accumulated amortization and impairment losses. Amortization is calculated using the straight-line method over the estimated useful lives of the assets. Estimated useful lives are as follows:

	Years
Non-compete agreements	3 - 20
Patents and trademarks	3 - 20
Customer lists	5 - 20
Software for internal use	3 - 7

c. Intangible assets with indefinite useful lives

Ticker: GRUMA Quarter: 2 Year: 2023

Intangible assets with indefinite useful lives are not amortized, but subject to impairment tests on an annual basis or whenever the circumstances indicate that the value of the asset might be impaired.

d. Research and development

Research costs are expensed when incurred.

Costs from development activities are recognized as an intangible asset when such costs can be measured reliably, the product or process is technically and commercially feasible, future economic benefits will be obtained, and the Company pretends and has sufficient resources in order to complete the development and use or sell the asset. The amortization is recognized in income based on the straight-line method during the estimated useful life of the asset.

Development costs that do not qualify as intangible assets are recognized in income when incurred.

Description of accounting policy for investment in associates [text block]

As of June 30, 2023, the Company has no investments in associated companies.

Description of accounting policy for investments in joint ventures [text block]

As of June 30, 2023, the Company has no investments in business combination.

Description of accounting policy for issued capital [text block]

-SHARE CAPITAL

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

Description of accounting policy for leases [text block]

Ticker: GRUMA Quarter: 2 Year: 2023

-LEASES

Contracts with counterparties celebrated by the Company, in which the transfer of the right to control the use of an identified asset for a certain term in exchange for a consideration, are classified as leases. There is control if the Company obtains the economic benefits from the use of the asset and has the right to direct and decide on the use of the asset during the term of the lease.

The Company applies the lease accounting model, which consists in the recognition of all leases within the statemen of financial position. Contracts celebrated by the Company for more than a 12-month term and whose underlying asset has a value greater than five thousand American dollars are recognized as leases.

For contracts that contain both lease and non-lease components, the Company, in its capacity as lessee, allocates the component value as follows:

- When there is an observable individual price for each component, it is separated and allocated according to the specific individual prices of the components, and applies for all assets of that class.
- When there is no individual price for some or all the components, the components will not be separated and are accounted for as a single lease component, and applies to all assets of that class.

The term of a lease is determined based on the non-cancellable period of the lease contract, plus the optional renewable periods agreed in such contract, if the Company is reasonably certain to extend by considering factors such as: improvements made to the leased asset, penalties for not extending the contract, determination of high costs to be incurred for the replacement of the leased asset, among others; and that the extension option can only be exercised by the Company.

Lease liabilities include the net present value of the following lease payments:

- a)Fixed lease payments, minus lease incentives receivable;
- b) Variable lease payments that are based on an index or a rate;
- c)Amounts expected to be payable by the group under residual value guarantees;
- d)The exercise price of a purchase option if the group is reasonably certain to exercise that option; and
- e)Payments of penalties for terminating the lease, if the lease term reflects the group exercising that option.

For leases, the Company recognizes, at the beginning of the contract, a liability equivalent to the present value of the lease payments agreed in the contract, discounted using the incremental interest rate. After the start date, the lease liability is measured by increasing its carrying value to reflect the accrued interest and decreasing its carrying value to reflect the lease payments made.

The incremental interest rate is determined using the interest rates of comparable bonds of companies with similar credit ratings as the Company, plus the Company's credit risk factor and the risk factor from the country where the asset is located. The above mentioned is considering a similar lease contract and similar security.

For property, plant and equipment leases containing terms of variable payments in which lease payments are modified during the term of the lease, possible future increases in variable lease payments are considered as part of the lease liability. Until effective, the lease liability is reassessed, and the right-of-use asset is adjusted.

Ticker: GRUMA Quarter: 2 Year: 2023

The interest expense of a lease liability is recognized monthly by applying the incremental interest rate the term of the lease.

At the beginning of the lease contract, the right-of-use asset is recognized at cost. The cost of the asset includes the present value of the lease payments agreed in the contract and the initial direct costs incurred by the Company, such as restorations or dismantling; after that date, the carrying value of the right-of-use asset is measured decreasing the accumulated depreciation and the accumulated impairment losses.

The Company applies the straight-line method for the depreciation of the right-of-use assets, which begins on the start date of the lease.

The right-of-use assets are normally depreciated in a straight line during the shortest period between the useful life of the asset and the lease term. If the Company has reasonable certainty to exercise a purchase option, the right-of-use asset depreciates over the useful life of the underlying asset.

The Company recognizes in income the payments for short-term leases or those in which the underlying asset is of low value, applying the straight-line method during the lease period.

For full or partial termination of lease contracts, the Company as lessee will recognize the new measurement of the lease liability adjusting the book value of the right-of-use asset resulting from the lease termination and the related gains or losses will be recognized in income of the year.

The Company applies impairment tests to the right-of-use assets when there are indications that the carrying value of the assets may not be recovered.

Description of accounting policy for measuring inventories [text block]

-INVENTORIES

Inventories are measured at the lower of cost and net realizable value. Cost is determined using the average cost method. The net realizable value is the estimated selling price of inventory in the normal course of business, less applicable variable selling expenses. The cost of finished goods and production in process includes raw materials, direct labor, other direct costs and related production overheads. Cost of inventories could also include the transfer from comprehensive income within equity of any gains or losses on cash flow hedges for purchases of raw materials.

Description of accounting policy for non-current assets or disposal groups classified as held for sale and discontinued operations [text block]

Ticker: GRUMA Quarter: 2 Year: 2023

Long-lived assets are classified as held for sale when (a) their carrying amount is to be recovered mainly through a sale transaction, rather than through continuing use, (b) the assets are held immediately for sale and (c) the sale is considered highly probable in its current condition.

For the sale to be considered highly probable:

- Management must be committed to a sale plan.
- An active program must have begun in order to locate a buyer and to complete the plan.
- The asset must actively be quoted for its sale at a price that is reasonable to its current fair value; and
- The sale is expected to be completed within a year starting the date of classification.

Non-current assets held for sale are stated at the lower of carrying amount and fair value less costs to sell.

Discontinued operations are the operations and cash flows that can be clearly distinguished from the rest of the entity, that either have been disposed of or have been classified as held for sale, and:

- Represent a line of business or geographical area of operations.
- Are part of a single coordinated plan to dispose of a line of business or geographical area of operations, or
- Is a subsidiary acquired exclusively with a view to resale.

Description of accounting policy for property, plant and equipment [text block]

-PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are valued at acquisition cost, less accumulated depreciation and recognized impairment losses. Cost includes expenses that are directly attributable to the asset acquisition.

Subsequent costs, including major improvements, are capitalized and are included in the carrying value of the asset or recognized as a separate asset, only when it is probable that future economic benefits associated with the specific asset will flow to the Company and the costs can be measured reliably. Repairs and maintenance are recognized in the income statement when incurred. Major improvements are depreciated during the remaining useful life of the related asset. Replacement and spare parts that the Company expects to use in more than one year and are attributable to a specific machine should be recognized within Property, plant and equipment. Leasehold improvements are depreciated in accordance with the useful life of the improvement component or the remaining lease term. Land is not depreciated.

Costs of borrowings, general and specific, of qualifying assets that require a substantial period of time (over one year) for acquisition or construction, are capitalized as part of the acquisition cost of these assets, until such time as the assets are substantially ready for their intended use or sale.

Ticker: GRUMA Quarter: 2 Year: 2023

Depreciation is calculated over the asset cost less residual value, considering its components separately. Depreciation is recognized in income using the straight-line method and applying annual rates that reflect the estimated useful lives of the assets. The estimated useful lives are summarized as follows:

	Years	
Buildings	25 - 50	
Machinery and equipment	5 - 25	

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

Gains and losses from sale of assets result from the difference between revenues of the transaction and the book value of the assets, which is included in the income statement as other (expenses) income, net.

Description of accounting policy for provisions [text block]

-PROVISIONS

Provisions are recognized when (a) the Company has a present legal or constructive obligation as a result of past events; (b) it is probable that an outflow of resources will be required to settle the obligation; and (c) the amount has been reliably estimated.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the specific risks of the obligation. The increase in the provision due to the passage of time is recognized as interest expense.

Description of accounting policy for recognition of revenue [text block]

-REVENUE RECOGNITION

The Company produces and sells corn flour, packaged tortilla and other related products such as flat bread, snacks and corn grits. The Company serves wholesale and retail markets, as well as institutional markets. Sales are recognized when control of the products has transferred, being when the products are delivered to the customers, and there is no unfulfilled obligation that could affect the customer's acceptance of the products, the risks of loss and

Ticker: GRUMA Quarter: 2 Year: 2023

obsolescence have been transferred to the customer, and the customer has accepted the products in accordance with the sales contract.

Revenue from sales is recognized based on the price specified in the contract, net of discounts, volume rebates and returns. Volume rebates are estimated, using the expected value method, and revenue is only recognized to the extent that it is highly probable that a significant reversal will not occur.

A refund liability is recognized for expected volume discounts payable to customers in relation to sales made until the end of the reporting period. No element of financing is deemed present as the sales are made with a short-term credit.

A receivable is recognized when the products are delivered as this is the point in time that the consideration is unconditional.

The payments made to customers, which represent a modification of the transaction price, are presented as a decrease of revenue.

Description of accounting policy for segment reporting [text block]

-SEGMENT INFORMATION

An operating segment is a component of the Company that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses relating to transactions with other components of the same entity. Operating results from an operating segment are regularly reviewed by the entity's chief executive officer to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available.

Description of accounting policy for subsidiaries [text block]

-SUBSIDIARIES

The subsidiaries are all entities (including structured entities) over which the Company has control. The Company controls an entity when the Company is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are incorporated in the consolidated financial statements starting on the date on which the control begins, until the date such control ceases.

Intercompany transactions, balances and unrealized gains on transactions between group companies are eliminated. Unrealized losses are also eliminated. Subsidiaries' accounting policies have been changed where necessary to ensure consistency with the policies adopted by the Company.

At June 30, 2023, the main subsidiaries included in the consolidation are:

Ticker: GRUMA Quarter: 2 Year: 2023

	% of ownership
Gruma Corporation and subsidiaries	100.00
Grupo Industrial Maseca, S.A. de C.V. and subsidiaries	100.00
Gruma International Foods, S.L. and subsidiaries	100.00
Mission Foods México, S. de R.L. de C.V	100.00

Description of accounting policy for trade and other payables [text block]

- TRADE ACCOUNTS AND OTHER ACCOUNTS PAYABLES

These balances represent the liabilities for goods and services provided to the Company before the end of the year that have not been paid. The amounts are not guaranteed and are generally paid within 30 days of recognition. Suppliers and other accounts payable are presented as current liabilities unless the balance is not payable within 12 months after the reporting period.

The Company has established supplier financing programs, through which they can discount their documents with different financial institutions. The balance payable derived from these programs is recognized within Trade accounts payable in the consolidated balance sheet, without generating a payment obligation with the financial institution. The financial cost of these operations is by the suppliers. This supplier program is presented as an operating activity in the statement of cash flows.

Accounts payable are initially recognized at fair value and subsequently valued at amortized cost using the effective interest rate method.

Description of accounting policy for trade and other receivables [text block]

-ACCOUNTS RECEIVABLE

Trade receivables are initially recognized at fair value and subsequently valued at amortized cost using the effective interest rate method, less provision for impairment. The Company has determined that the amortized cost does not represent significant differences with respect to the invoiced amount from short-term trade receivables, since the transactions do not have relevant associated costs.

Allowances for doubtful accounts or impairment represent expected future credit losses. The recognition of these losses is obliged since the moment the trade receivable is recognized.

Ticker: GRUMA Quarter: 2 Year: 2023

Description of accounting policy for transactions with non-controlling interests [text block]

-TRANSACTIONS WITH NON-CONTROLLING INTEREST WITHOUT CHANGE OF CONTROL

The Company applies a policy of treating transactions with non-controlling interest as transactions with equity owners of the Company. When purchases from non-controlling interest take place, the difference between any consideration paid and the relevant interest acquired of the carrying value of net assets of the subsidiary is recognized as equity transactions; therefore, no goodwill is recognized with these acquisitions. Disposals of non-controlling interests result in gains or losses for the Company and are recorded in equity when there is no loss of control.

Ticker: GRUMA Quarter: 2 Year: 2023

[813000] Notes - Interim financial reporting

Disclosure of interim financial reporting [text block]

BASIS OF PREPARATION

The consolidated financial statements non-audited of Gruma, S.A.B. de C.V. and Subsidiaries for all the periods presented have been prepared in accordance with the International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB). The IFRS also include the International Accounting Standards (IAS) in force, as well as all the related interpretations issued by the IFRS Interpretations Committee, including those previously issued by the Standing Interpretations Committee. The Company applied the IFRS as of June 30, 2023.

The Company's non-audited consolidated interim financial statements do not include all of the information and disclosures required in the annual financial statements, and should be read together with the Company's 2022 annual financial statements. The interim non-audited consolidated financial statements of the Company were authorized by the Chief Administrative Office on July 12, 2023, subsequent events have been considered.

BASIS OF MEASUREMENT

The consolidated financial statements have been prepared based on historical cost, except for the fair value of certain financial instruments as described in the policies shown below.

The preparation of financial statements requires that management make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results could differ from those estimates. The key factors in the estimates and assumptions remain the same as those applied in the previous year.

FUNCTIONAL AND PRESENTATION CURRENCY

The functional currency of GRUMA, S.A.B. de C.V., parent company, is in Mexican pesos. The presentation currency for the consolidated financial statements is the American dollar.

USE OF ESTIMATES AND JUDGMENTS

The relevant estimates and assumptions are reviewed on a regular basis. The revisions of accounting estimates are recognized in the period in which the estimate is reviewed and in any future period that is affected.

In particular, the information for assumptions, uncertainties from estimates, and critical judgments in the application of accounting policies, that have the most significant effect in the recognized amounts in these consolidated financial statements are described below:

- The assumptions used for the determination of fair values of financial instruments.
- The assumptions and uncertainties with respect to the interpretation of complex tax regulations, changes in tax laws, and the amount and timing of future taxable income.
- The key assumptions in impairment testing for long-lived assets used for the determination of the recoverable amount for the different cash generating units.

Ticker: GRUMA Quarter: 2 Year: 2023

• The actuarial assumptions used for the determination of employee benefits obligations.

SEGMENT INFORMATION

The Company's reportable segments are strategic business units that offer different products in different geographical regions. These business units are managed separately because each business segment requires different technology and marketing strategies.

The Company's reportable segments are as follows:

- Corn flour and packaged tortilla division (United States):
 - Manufactures and distributes more than 20 varieties of corn flour that are used mainly to produce and distribute different types of tortillas and tortilla chip products in the United States. The main brands are MASECA for corn flour and MISSION and GUERRERO for packaged tortillas.
- Corn flour division (Mexico):
 - Engaged principally in the production, distribution and sale of corn flour in Mexico under MASECA brand. Corn flour produced by this division is used mainly in the preparation of tortillas and other related products.
- Corn flour and packaged tortilla and other (Europe):
 - Manufactures and distributes varieties of flour that are used to produce different types of tortillas, flat breads, grits and other in the same category in Europe. The main brands are MASECA for corn flour and MISSION for packaged products.
- Other segments:
 - This section represents those segments whose amounts on an individual basis do not exceed 10% of the consolidated total of net sales, operating income and assets. These segments are:
 - a)Corn flour, hearts of palm, rice, and other products (Central America).
 - b)Packaged tortillas (Mexico).
 - c) Wheat flour tortillas and snacks (Asia and Oceania).
 - d)Technology and equipment, which conducts research and development regarding flour and tortilla manufacturing equipment, produces machinery for corn flour and tortilla production and is engaged in the construction of the Company's corn flour manufacturing facilities.
 - e)Balanced feed for livestock (Mexico)

All inter-segment sales prices are market-based. The Chief Executive Officer evaluates performance based on operating income of the respective business units.

Ticker: GRUMA Quarter: 2 Year: 2023

The outstanding loans documentation contains various obligations, mainly regarding compliance with financial ratios and delivery of financial information, which if not complied with or remedied within a certain period to the satisfaction of the creditors, could be considered as a cause for early termination.

Ticker: GRUMA Quarter: 2 Year: 2023

Financial ratios are calculated according with the formulas established in the credit agreements. The main financial ratios contained in the credit agreements are the following:

- Interest coverage ratio, defined as the ratio of consolidated earnings before interest, tax, depreciation and amortization (EBITDA) of the last twelve months to consolidated interest charges of the last twelve months, should not be less than 2.5 times.
- Net Leverage ratio, defined as the ratio of consolidated net debt (determined as the sum of the outstanding principal balance of consolidated indebtedness and guarantees of the Company for obligations with third parties unrelated to the Company's core business minus cash and cash equivalents), to consolidated EBITDA of the last twelve months, should be no greater than 3.5 times.

At June 30, 2023 the Company was in compliance with the financial covenants, as well as with the delivery of the required financial information.

EQUITY

The Company's outstanding common stock consists of 369,923,140 Series "B", Class I shares, amounting to \$371,006 thousand dollars.

As of June 30, 2023, the Company repurchased 203,672 shares.

DIVIDENDS

At the Shareholders' Meeting of GRUMA, S.A.B. de C.V., held on April 21, 2023, it was agreed to pay a cash dividend at a rate of \$5.40 pesos per outstanding share. CONTINGENCIES

Ticker: GRUMA Quarter: 2 Year: 2023

The Company and its subsidiaries are subject to litigation arising during the normal course of business. It is the Company's policy to accrue for amounts related to these legal matters if it is probable that a liability has been incurred and an amount is reasonably estimable. In the opinion of the Company, the resolution of these matters will not have a material adverse effect on the Company's consolidated financial statements.

Description of significant events and transactions

Impacts of the conflict in Ukraine

During February 2022, Russian military forces invaded Ukraine. This has resulted in the imposition of sanctions on Russia and Bielorrusia by the United States of America, the United Kingdom, the European Union and other countries, as well as counter sanctions imposed by Russia to such countries. This has caused an abrupt change in the geopolitical situation, with significant uncertainty about the duration of the conflict.

The conflict has also contributed to increased volatility in currency markets, energy prices, raw materials and other input costs, as well as supply chain tensions and rising inflation in many countries.

The Company has assessed the consequences of this conflict in the consolidated financial statements, with the following conclusions:

Control Evaluation: In accordance with IFRS 10 "Consolidated Financial Statements" the Company has evaluated and confirms that the changes in the legal and operating environment of its subsidiaries located in Russia and Ukraine have not affected the ability to exercise control over the entities in these countries.

The impact in the second quarter of 2023, in the operations of the subsidiaries located in Ukraine and Russia was not material to consolidated revenues, operating income and consolidated financial position.

The Company will continue to monitor the events resulting from this ongoing conflict, evaluating the options available to try to mitigate a greater risk of loss and we will continue to evaluate the possible impact on the investment in these subsidiaries.

Description of accounting policies and methods of computation followed in interim financial statements [text block]

The interim consolidated financial statements have been prepared in accordance with the same accounting policies and methods as in the preparation of the audited consolidated financial statements for the most recent year, except for income tax expense. For interim reporting, the Company determines the income tax expense using the annual average effective rate for its most important subsidiaries.

See section of accounting policies and calculation methods in [800600 - Notes - List of Accounting Policies]

Ticker: GRUMA Quarter: 2 Year: 2023

Explanation of seasonality or cyclicality of interim operations

The Company's products do not have significant seasonality, however the sales volume of some products change slightly during the year.

Explanation of nature and amount of items affecting assets, liabilities, equity, net income or cash flows that are unusual because of their nature size or incidence

In the second quarter of 2023, the Company recognized a non-monetary impairment charge of \$4.7 million dollars in the operating results in "other (expenses) income, net" due to the goodwill impairment associated with the corn flour packaged tortilla United States segment. This impairment loss reflects a decrease in the recoverable value of the CGU.

Explanation of nature and amount of changes in estimates of amounts reported in prior interim periods or prior financial years

There are no changes in estimates.

Explanation of issues, repurchases and repayments of debt and equity securities

The Company does not have repayments of debt and equity securities.

As of June 30, 2023, the Company repurchased 203,672 shares.
